Powerful, Durable, Professional

Root Ranger 3000™ Jetter Nozzle

The RIDGID Root Ranger 3000 Jetter Nozzle is designed to completely clear obstructions from your blocked drain. The Root Ranger 3000 can be used to cut through tough grease and sludge build-up, as well as stubborn tree roots. The single rear facing turbo jet produces a powerful, concentrated stream of water that can be used to easily shear root obstructions clear from the drain wall.

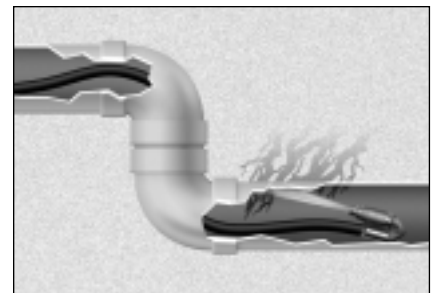

The specially engineered head allows the Root Ranger 3000 to push its way through the toughest blockages, while the rear facing turbo jet scours the drain clean and flushes away debris.

The Root Ranger 3000 Jetter Nozzle is specifically designed to enhance the performance of your RIDGID KJ-3000 Jetter. The Root Ranger 3000 works on a 3/8" jet hose with a 1/4" NPT threaded connection. The jet nozzle is rated to a working pressure of 3000 psi and is operable in drains of 4" – 8".

Features and Benefits

- **Root Cutting Ability** – The intensity of the rear facing turbo jet, produces a powerful, concentrated stream of water that sheers roots clear from the drain wall.
- **Rear Facing Turbo Jet** – Designed to thoroughly blast away build up and debris from the drain walls. Good on Grease, Sludge, Mud and Root obstructions.
- **Pointed Penetrating Head** – Designed to allow the jet nozzle to push through obstructions, allowing the rear facing turbo jet to fully clear the drain.
- **Water Lubricated** – No grease or oil fittings to maintain.
- **Leaves a Smooth Finish** – Drains stay clearer longer, reducing the number of callbacks.
