The NEW RIDGID® FlexShaft K9-12 machine is the most compact version of the FlexShaft Drain Cleaning Machines. The fully enclosed housing contains 30' of FlexShaft cable, encapsulated in nylon sheath for less mess and easy cleanup. The lightweight, portable design is perfect for 1¼" - 2" pipes.

- **Wall-To-Wall Clean:** Chain knocker fully expands inside the pipe reaching wall-to-wall, clears the blockage and restores the pipe to full flow capacity
- **Less Mess & Quick Cleanup:** FlexShaft cable is fully enclosed in a flexible yet durable nylon-sheath and fully contained in housing for less mess and quick clean up
- **Intuitive Use & Ergonomic Design:** Powered by any standard 1800-2500 RPM cordless drill
- **Cable Protection System:** Built-in clutch design extends cable life to maximize uptime
- **Lightweight System:** Less than 10lb unit is a clear first choice to tackle slow or blocked drains
- **Adaptable Accessories:** Compatible with plain chains, carbide chains, penetrating heads, brushes and more
RIDGID® FlexShaft® cable is spun by attaching your cordless drill to the input shaft on the housing. As the cable spins, the chain knocker attached will expand to provide wall-to-wall pipe cleaning. Fast setup and cleanup, quick cleaning, and cordless convenience allow you to restore your pipes to full flow capacity as efficiently as possible.
