THE DEGREE OF DIFFERENCE

THE DIFFERENCE IS IN THE DETAILS

Introducing SeeSnake® cameras with TruSense™ technology that bring powerful data capability to plumbing diagnostics

The SeeSnake Mini and Standard with TruSense provide down pipe visibility, vastly improved with **High Dynamic Range (HDR)**, giving more clearly defined details of the pipe characteristics. **TiltSense™** displays the camera's pitch in a pipe on a connected SeeSnake CSx series monitor helping you to diagnose even the most difficult inspections.

RIDGID® SEESNAKE® MINI WITH TRUSENSE™

INSPECT 40 TO 200 MM LINES UP TO 61 M

The Mini's moderately stiff 200' (61 m) push cable strikes a good balance between stiffness and the ability to navigate turns.

DID YOU KNOW…

NON-HDR IMAGE

HDR IMAGE & **TiltSense™**

- The High Dynamic Range (HDR) image sensor can be toggled on/off on SeeSnake CSx monitors.
- HDR provides a better ratio on black, creating more contrast.
- The TiltSense icon on the CSx monitor changes color based on negative pitches (brown) and positive pitches (blue).
- Leverage the full potential of your TruSense™ enabled Reel and combine with a SeeSnake CSx monitor.
